

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	31 January 2025
Team ID	
Project Name	Strategic Product Placement Analysis
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

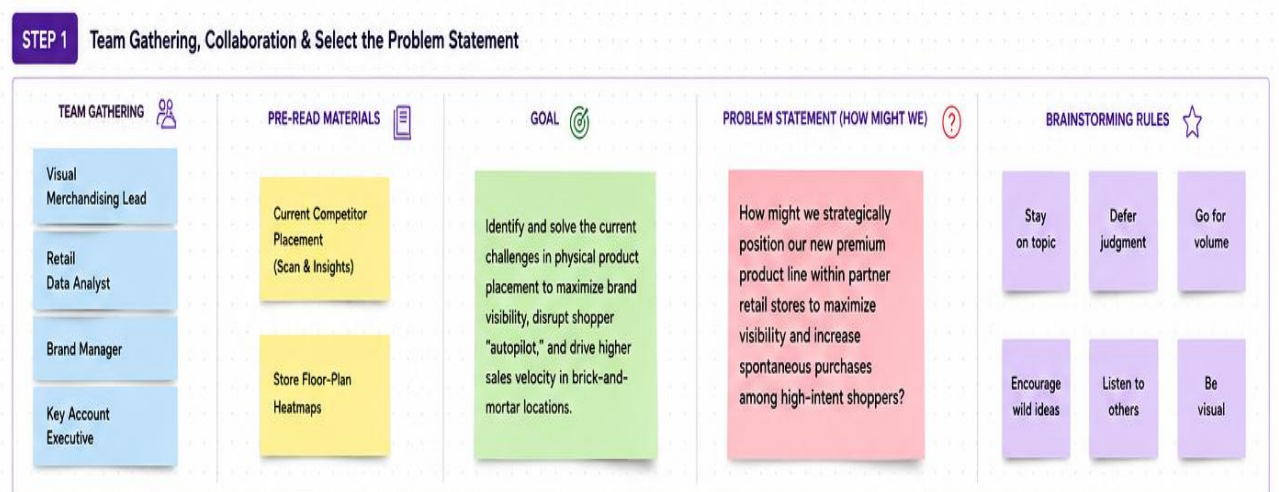

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

This is the core focus of the brainstorm, framed as a "How Might We" statement:

How might we strategically position our new premium product line within partner retail stores to maximize visibility and increase spontaneous purchases among high-intent shoppers?

Key Rules of Brainstorming to Enforce: To run a smooth and productive session, the team must follow these rules: stay on topic, defer judgment, go for volume, encourage wild ideas, listen to others, and be visual

Step-2: Brainstorm, Idea Listing and Grouping

After taking turns sharing ideas for 10 minutes, the team clustered related notes and gave each a sentence-like label.

Cluster 1: Cross-Merchandising Synergy

- o Place our premium beverage products directly in the fresh bakery section.
- o Position our complementary snack items on the same endcap as major beverage brands.
- o Use clip-strips to hang our products next to high-volume seasonal items.

Cluster 2: High-Traffic Checkout Disruptions

- o Secure eye-level shelving specifically at self-checkout kiosks.
- o Install branded mini-coolers at the end of every traditional register lane.
- o Create floor decals leading from the store entrance directly to the checkout impulse racks.

Cluster 3: Experiential & Interactive Zones

- o Set up weekend sampling stations staffed by brand ambassadors in the main center aisles.
- o Install interactive QR-code shelf-talkers that offer an instant digital coupon.
- o Use digital endcap screens that play our product commercials when motion is detected.

Step-3: Idea Prioritization

The team evaluated the clustered ideas and placed them on a grid based on Importance (Y-axis) and Feasibility (X-axis) to determine which to move forward with.

High Importance / High Feasibility (Top Priorities)

- Cross-merchandising our premium beverages in the fresh bakery section.
- Securing eye-level shelving at self-checkout kiosks.
- Positioning complementary snack items on endcaps with major brands.

High Importance / Low Feasibility (Strategic Long-Term Bets)

- Weekend sampling stations with brand ambassadors (Requires high budget and complex logistical approval from retail partners).
- Installing branded mini-coolers at traditional registers (Requires high upfront capital expenditure and negotiation for premium floor space).

Low Importance / High Feasibility (Quick Wins)

- Using clip-strips next to high-volume seasonal items.
- Standard interactive QR-code shelf-talkers for instant coupons.

Low Importance / Low Feasibility (Discard or Re-evaluate)

- Digital endcap screens triggered by motion (Too expensive for the anticipated ROI).
- Floor decals leading from the entrance to checkout (Most retail partners strictly prohibit floor modifications).
