

Ideation Phase

Empathize & Discover

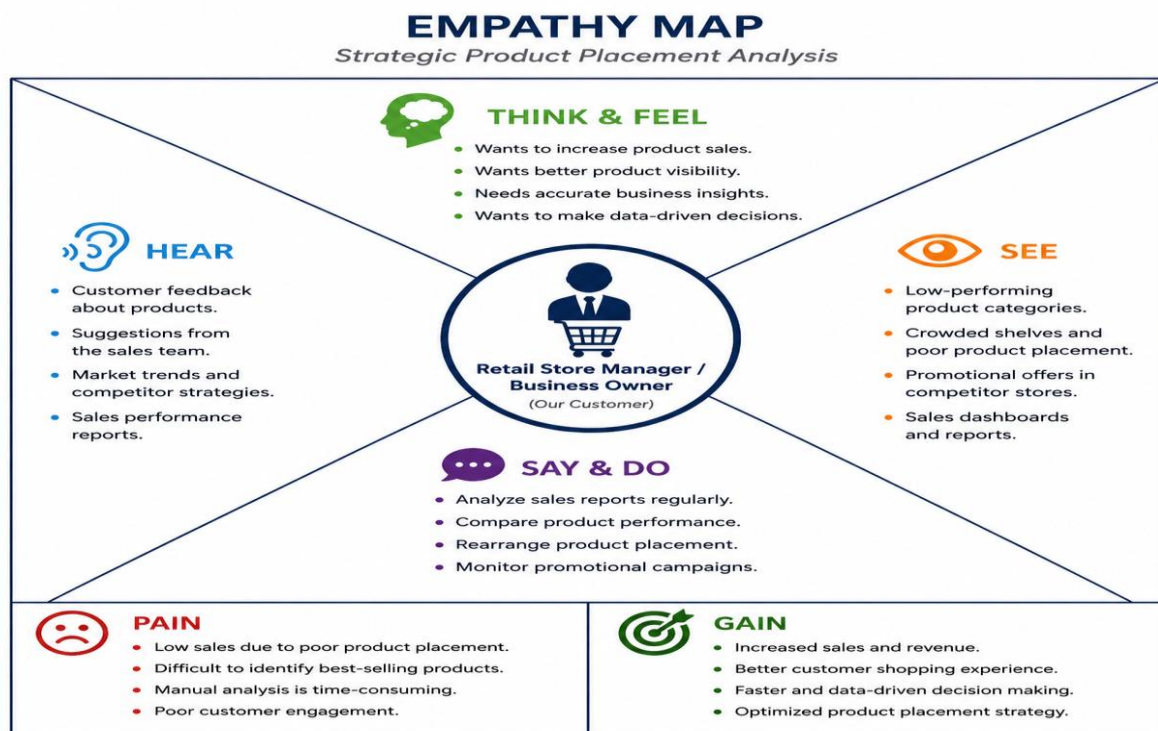

Date	29 June 2026
Team ID	
Project Name	Strategic Product Placement Analysis
Maximum Marks	

Empathy Map Canvas:

An empathy map is a visual framework used to understand the needs, behaviors, thoughts, and challenges of users. In this project, the empathy map helps identify the expectations and problems faced by retail store managers and business owners while making product placement decisions.

By understanding what users think, feel, see, hear, say, and do, the project aims to develop a data-driven solution that improves product visibility, enhances customer satisfaction, and increases sales through effective product placement analysis using Tableau dashboards.
