

Strategic Product Placement Analysis

Customer Journey Map: High-Intent Shopper Retail Experience

	Entice	Enter	Engage	Exit	Extend
	How does the shopper initially become aware of the product in-store?	What does the shopper experience as they navigate to the category?	In the core moment of decision, what happens?	What do they experience at the checkout phase?	What happens post-purchase?
Steps What does the shopper typically experience?	Enters the retail store, grabs a shopping cart, and notices entrance promotional signage or seasonal displays.	Navigates the main aisles, heading towards their primary target categories (e.g., fresh bakery or main grocery).	Spots the cross-merchandised premium product line on an endcap or interactive shelf-talker. Stops to inspect.	Proceeds to the self-checkout kiosk. Notices secondary placement of the product. Completes purchase.	Consumes the product at home. Experiences the premium quality and considers repurchasing on the next trip.
Interactions People, Places, Things	Things: Store entrance, carts, digital entrance screens, initial promotional flyers.	Places: High-traffic perimeter aisles, fresh food sections. Things: Aisle markers.	Things: QR-code shelf-talkers, complementary snack cross-merchandising displays, product packaging.	Places: Self-checkout zone. Things: Eye-level shelving at the kiosk, POS system, digital payment.	Things: The physical product, packaging recycling, potential digital follow-up (if loyalty card used).
Goals & Motivations "Help me..."	"Help me get my bearings and see if there are any immediate good deals today."	"Help me find my routine items quickly without getting stuck in crowded aisles."	"Help me understand why this premium product is worth the extra cost over my usual brand."	"Help me check out fast without hassle, but maybe grab a last-minute treat."	"Help me feel validated that spending extra on this premium product was a good decision."
Positive Moments Enjoyable, delightful	Seeing clear, well-lit displays immediately upon entry sets a positive shopping tone.	Finding exactly what they need in the bakery section easily.	Scanning the QR shelf-talker to instantly receive a digital coupon for the premium line.	Conveniently grabbing a chilled version of the product right at the self-checkout for immediate consumption.	Enjoying the product and noticing the high-quality ingredients compared to standard alternatives.

Entice

Extend

What happens post-purchase?

Negative Moments

Frustrating, confusing

Cluttered entrances with too many conflicting brand messages causing visual fatigue.

"Shopper Autopilot" — walking past primary aisles without noticing new product introductions.

The product is placed too high or too low on the shelf, making it hard to read the premium labeling.

Self-checkout line is too long, or the impulse rack is messy and disorganized.

Forgetting the brand name after throwing away the packaging, making repurchase difficult.

Areas of Opportunity

How might we make it better?

Use clean, bold, color-blocked displays at the entrance that contrast with the store's default color palette.

Implement "disruptive" floor graphics (if allowed) leading from the bakery to our cross-merchandised display.

Ensure prime eye-level positioning and train store staff to keep the display fully stocked and front-faced.

Install branded, well-lit mini-coolers specifically at the most heavily trafficked self-checkout lanes.

Include a subtle call-to-action on the packaging to follow the brand on social media or join a loyalty program.
