

Date	01 July 2026	Maximum Marks	5 Marks
Team ID		Project Name	Strategic Product Placement Analysis System

Project Planning Phase

Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Registration & Login	USN-1	As an analyst, I can log into the web application securely using corporate credentials.	3	High	Dev A, Dev B
Sprint-1	Data Ingestion	USN-2	As an analyst, I can upload CSV files containing sales data and store floor plan images.	5	High	Dev C
Sprint-2	Spatial Mapping	USN-3	As the system, I will map POS data coordinates to the uploaded digital floor plan grid.	8	High	Dev B, Dev D
Sprint-2	Heatmap Visualization	USN-4	As an analyst, I can toggle an interactive heatmap overlay to identify trafficked aisles.	5	High	Dev A, Dev C
Sprint-3	Dashboard	USN-5	As a store manager, I can view finalized product placement recommendations on mobile.	5	Medium	Dev B

Sprint-3	Reporting	USN-6	As an analyst, I can export the placement strategy as a PDF report.	3	Medium	Dev D
----------	-----------	-------	---	---	--------	-------

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed	Sprint Release Date (Actual)
Sprint-1	8	10 Days	06 Jul 2026	17 Jul 2026	-	-
Sprint-2	13	10 Days	20 Jul 2026	31 Jul 2026	-	-
Sprint-3	8	10 Days	03 Aug 2026	14 Aug 2026	-	-

Velocity:

Imagine we have a 10-day sprint duration, and the target velocity of the team is 13 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day):

$$AV = (Velocity) / (Sprint Duration) = 13 / 10 = 1.3 \text{ points per day.}$$

Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.
